WORK EXPERIENCE

Front - End Engineer   09/2022 – 03/2024
Cyces Innovation Labs LLP

 Projects

- **Ideate**

  - Developed an internal application for the company facilitating buying and selling activities akin to the stock market.
  - Spearheaded 80% of the project independently.
  - Successfully migrated the MySQL database to Postgres SQL and transitioned from Prisma ORM to Sequelize ORM.

- **SiteScribe**

  - Designed an application for streamlined site surveying.
  - Implemented graphical representations for the Reports Module and introduced a user-friendly Drag and Drop feature for the form builder.

- **GeoOps**

  - Led the integration of APIs and development of all application components.
  - Overcame significant challenges in managing ticket filters.
  - Implemented graphical data representation using Chart JS for detailed reporting.

- **Techademy (Super Admin - B2B)**

  - Established the foundational setup for the project and contributed to 90% of its components.
  - Dynamically managed all form fields with robust backend support.
  - Independently handled 80% of API integrations, marking it as one of the most challenging projects undertaken.

- **Techademy (Tenant Flow - B2B)**

  - Configured dynamic subdomains on the frontend based on tenant creation.

- Initiated the project setup and delivered 70% of the requisite components.
- Independently managed 50% of API integrations and implemented role-based routing.

- **Techademy (Website)**

  - Led the rapid development of a website within a tight timeline.
  - Oversaw 80% of component creation.
  - Integrated Contentful CMS for efficient content management.

INTERNSHIP EXPERIENCE

Front - End Engineer   02/2022 – 04/2022
Gumstack

- Used Middleman static site generator for creating Gumstack's official website.
- Implemented on-page Search Engine Optimization (SEO) strategies to enhance website visibility and performance.
- Leveraged Bootstrap to design 90% of web pages and extensively customized the website theme.
- Gained proficiency in turbo-rails.
- Collaborated effectively using GitLab for version control and project management.
